DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, 10-16, and 29-30, drawn to quality measurement based on reconstructing blocks of spectral data as critical band in a quantization loop, classified in class 704, subclass 230.
- II. Claims 17-22 and 23-28, drawn to quality measurement based on data normalization, classified in class 704, subclass 224.
- III. Claims 31-35, drawn to quality measurement based on audio masking, classified in class 704, subclass 200.1.
- IV. Claims 36-42 and 43-54, drawn to quality measurement based on frequency band weights, classified in class 704, subclass 200.1.
- V. Claims 55-59, drawn to an apparatus for providing a multi-channel transform to multi-channel audio and determining signal quality, classified in class 704, subclass 500.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 2654

claimed because a plurality of audio quality measurement methods may be used in the channel mode dependent quality measurement apparatus. The subcombination has separate utility such as methods of determining audio signal quality in a plurality of environments.

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II, III, and IV each have separate utility such as audio quality measurement in single channel or other audio environments. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
